

Accelerated Weathering Ultra Violet (UV)

Exposure: UVCON - UV accelerated weathering tester

Exposure Period: 1500 hrs - equivalent to 3 to 5 years

Measurement: Delta E - measures total change in colour

Results: InfinitiTree's Dark Oak exhibited a Delta E of **0.75 after 1500 hrs**

InfinitiTree's Teak exhibited a Delta E of **1.75 after 1500 hrs**

Conclusion: Since the average consumer cannot detect a colour change below a Delta E of 2, **InfinitiTree shows no significant signs of weathering making it the premium outdoor choice.**
